

Installation Manual

1. Download xampp
2. clone the repository (I think you already did that.)

Hosting

1. Copy the nbi-car folder in **C:\xampp\htdocs**
2. Find the httpd-vhosts.conf in the **C:\xampp\apache\conf\extra**
 - 2.1 Open it in editor Ex. either Notepad++ or Sublime Text
 - 2.2 Copy this code and paste it

```
<VirtualHost *:80>
    DocumentRoot "C:/xampp/htdocs/nbi-car/public"
    ServerName nbi-car.gov.ph
</VirtualHost>
```
 - 2.3 Then lastly SAVE
3. Find the hosts file in the **C:\Windows\System32\drivers\etc**
 - 3.1 Open it in editor Ex. either Notepad++ or Sublime Text
 - 3.2 Copy this and paste it (this is for the localhost only)

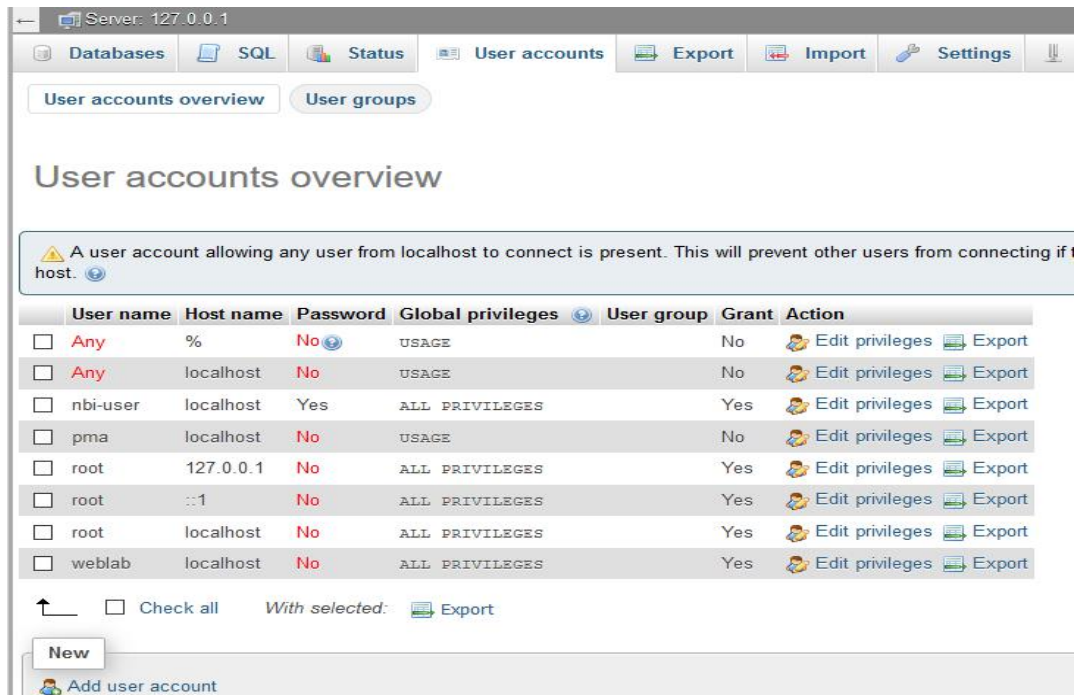

```
127.0.0.1nbi-car.gov.ph
```
 - 3.3 The lastly SAVE

Database Exporting

1. Open a web browser (Google Chrome, Microsoft Edge, Mozilla Firefox)
2. Go to this <http://localhost/phpmyadmin/> or 127.0.0.1/phpmyadmin
3. If ask a login credentials
 - 3.1 Enter username : root
 - 3.2 Enter Password: (leave it null) means no password just press ENTER or Click

Login

4. Go to User Accounts Tab

The screenshot shows the phpMyAdmin interface for the 'Server: 127.0.0.1'. The 'User accounts' tab is selected. The page title is 'User accounts overview'. A warning message states: 'A user account allowing any user from localhost to connect is present. This will prevent other users from connecting if I host.' Below this is a table of user accounts.

<input type="checkbox"/>	User name	Host name	Password	Global privileges	User group	Grant	Action
<input type="checkbox"/>	Any	%	No	USAGE		No	Edit privileges Export
<input type="checkbox"/>	Any	localhost	No	USAGE		No	Edit privileges Export
<input type="checkbox"/>	nbi-user	localhost	Yes	ALL PRIVILEGES		Yes	Edit privileges Export
<input type="checkbox"/>	pma	localhost	No	USAGE		No	Edit privileges Export
<input type="checkbox"/>	root	127.0.0.1	No	ALL PRIVILEGES		Yes	Edit privileges Export
<input type="checkbox"/>	root	:::1	No	ALL PRIVILEGES		Yes	Edit privileges Export
<input type="checkbox"/>	root	localhost	No	ALL PRIVILEGES		Yes	Edit privileges Export
<input type="checkbox"/>	weblab	localhost	No	ALL PRIVILEGES		Yes	Edit privileges Export

Below the table, there is a 'Check all' checkbox and a 'With selected: Export' button. At the bottom, there is a 'New' button and an 'Add user account' link.

4.1 Click Add user account

Username: nbi-user

Hostname: local

Password: XlgqWLkXrcLTt41l

Check for the **Grant all privileges on wildcard name(username_%)**

Check for the Global privileges **CHECK ALL**

See below for references.

The screenshot shows the MySQL User Management interface. The 'Login Information' section includes fields for User name (nbi-user), Host name (Local), Password (XlgqWLkXrcLTt41l), and Re-type. A warning message states: 'An account already exists with the same username but possibly a different hostname.' The Authentication Plugin is set to 'Native MySQL authentication'. The 'Database for user account' section has two checkboxes: 'Create database with same name and grant all privileges.' (unchecked) and 'Grant all privileges on wildcard name (username_%)' (checked). The 'Global privileges' section has a 'Check all' checkbox checked.

5. Click the New on the left side of the browser

5.1 Database name should be **userdb** afterwards click Create

Databases

The screenshot shows the 'Create database' form in MySQL. The database name is 'userdb' and the collation is 'latin1_swedish_ci'. The 'Create' button is visible. Below the form is a table with columns: Database, Collation, and Action.

6. Import the database in the your database

Note: The database is in the repository where the folder named database, import the latest version of the database.

Importing into the database "sample"

File to import:

File may be compressed (gzip, bzip2, zip) or uncompressed.
A compressed file's name must end in `.[format].[compression]`. Example: `.sql.zip`

Browse your computer: No file selected. (Max: 750MiB)

You may also drag and drop a file on any page.

Character set of the file:

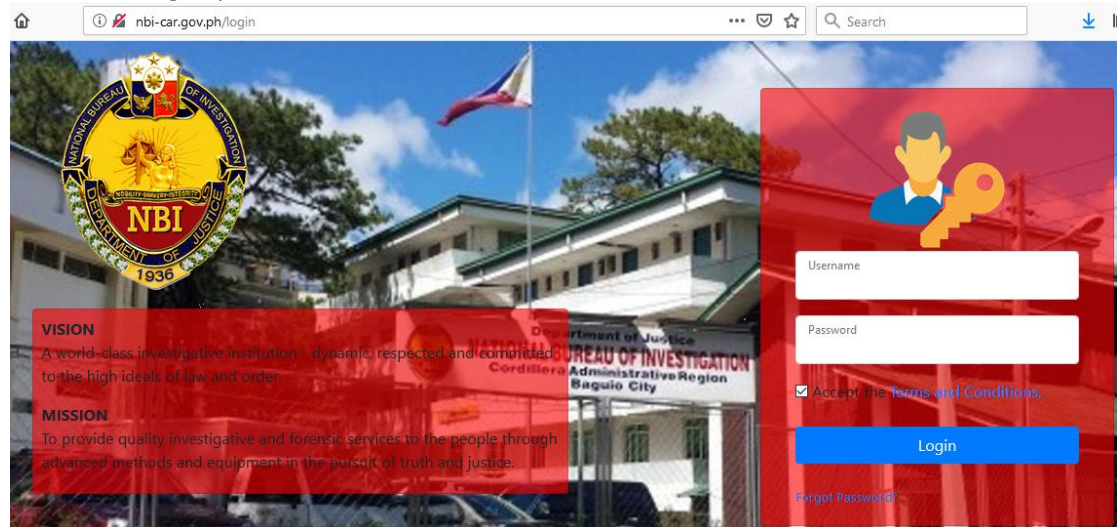

6.1 Lastly click for the Go button.

Testing the website

1. Open any web browser except for Safari.

1.1 Type the domain name being provided in the hosts file

1.2 `nbi-car.gov.ph`

User credentials

Admin 1

Username: admin1
Password: adminadmin

Admin 2

Username: admin2
Password: admin2

Admin 3

Username: admin3
Password: admin3

Encoder 1

Username: encoder1
Password: encoder1

Encoder 2

Username: encoder2
Password: encoder2
